VISUALIZATION TOOL TO HELP TRAVEL AGENCIES PLAN THEIR TRAVEL TOURISM PROGRAMS USING MATPLOTLIB

Presented by Fatimah Alqahtani
SDAIA Data Science Bootcamp

INTRODUCTION

The project aims to help travel agencies visualize the traffic in train stations to decide upon their travel plans.

Newuture is new tourism company focus on:

Stations

Prioritize the higher traffic stations for the upgrades

Peak time

Methodology

VISUALIZATION

Exit

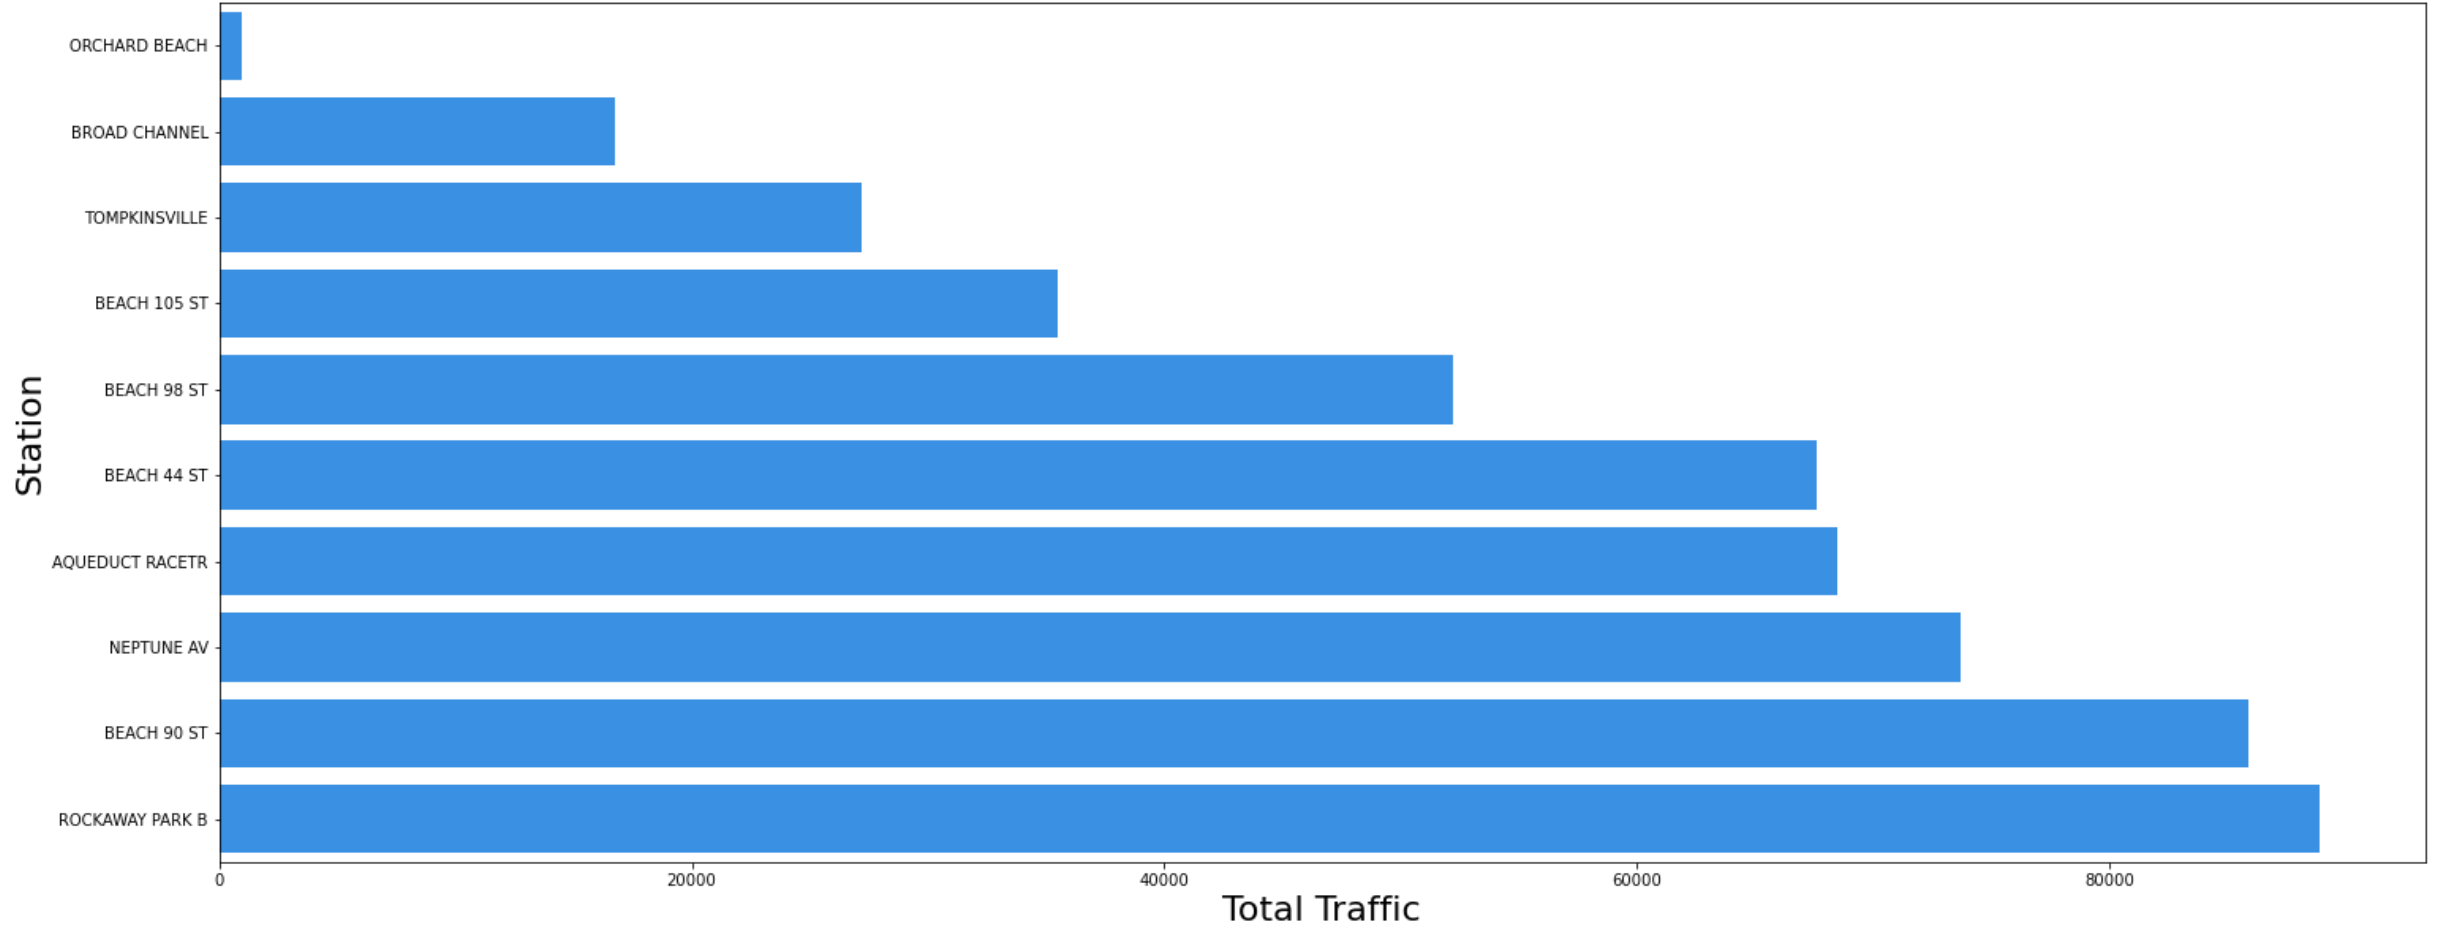

Ditmars Boulevard &
31 Street

RESULT

Less Trafficed Stations

A low-angle, upward-looking perspective of several modern skyscrapers with glass facades. The buildings converge towards the top center of the frame, creating a strong sense of height and scale. The sky is a deep blue with scattered white clouds. A bright sun is visible near the top center, creating a lens flare effect. The entire image is framed by a thin white border.
